DETAILED ACTION

Priority

- 1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-
- (d). The certified copy has been filed in parent Application No. 09/777,378, filed on 02 February 2001.

Information Disclosure Statement

2. Information disclosure statement identified as an enclosed document filed with the application is not found in application

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Abstract contains "means" in lines 1 and 6.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Phraseology "the both threads" in claims 1, 4, and 7 are unclear. Examiner suggests removing "the" from the aforementioned phrase and clearly defining "both threads" (e.g. both cap and vessel threads).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Spatz et al. Spatz discloses the same invention including a capping device that clamps a cap (3), vertically places and screws said cap (3) onto a vessel (1), measures and reacts to a change in force on cap (3,13,15,17), while rotating cap (3) to a predetermined torque (see column 4, line 35) through at least one complete revolution (see column 5, lines 4-6), and stops rotation after predetermined torque is achieved (column 4, lines 34-43); comprising an elevating means (see column 4, lines 3-12), a measuring means (13), an angle detection means (17), and a control means (19).

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson, Muto et al., Obrist, and Brownbill are cited to show related methods.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Nash whose telephone number is (703) 305-4959. The examiner can normally be reached on Monday Thursday from 8 a.m. to 5 p.m. or my supervisor Rinaldi I. Rada whose telephone number is (703) 308-2187.

The fax number for this Group is (703) 305 -3579.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1148.
